Re: COVID-19 Energy Assistance Program, Implementation by Gas Utilities

Background

The Minister of Energy, Northern Development and Mines and the Associate Minister of Energy in a letter dated June 1, 2020 (Ministers' Letter) asked the Ontario Energy Board (OEB) for support in implementing the COVID-19 Energy Assistance Program (CEAP). The Ministers stated that government will make available \$9 million under CEAP for customers who are behind on their electricity and natural gas bills as a result of the COVID-19 emergency. The intention of CEAP is to allow residential customers to catch up on their energy bills and resume regular payments. The Ministers' Letter asks the OEB to take steps necessary to ensure that natural gas distributors (as well as electricity distributors and unit sub-meter providers) provide CEAP to their residential customers.

On June 16, 2020, the OEB issued a Decision and Order amending the licences of all electricity distributors and unit sub-meter providers to provide for the implementation of CEAP (Licence Decision)¹. The Licence Decision sets out the conditions for, among other things, the use of an OEB prescribed application form for the electricity sector, providing consumers with the application form, assessing eligibility of consumers based

¹ EB-2020-0162

on OEB provided criteria, the amounts of credits to be provided to eligible consumers and the means of being reimbursed for CEAP support amounts.

The Ministers' Letter describes CEAP as an expansion of the Low-income Energy Assistance Program (LEAP), and to be consistent with this statement the OEB has identified the four natural gas distributors that participate in LEAP as eligible for CEAP funding. These are: Enbridge Gas Inc., Epcor Natural Gas Limited Partnership, and the natural gas distribution services provided by Utilities Kingston and Kitchener Utilities (Gas Utilities). In keeping with the intent of the Ministers' Letter and the OEB's mandate to protect the interests of consumers with respect to the price of gas service, the OEB's expects that the Gas Utilities will assist with the administration of CEAP. The purpose of this letter is to set out the OEB's expectations and conditions for a Gas Utility to provide CEAP and be reimbursed for any financial assistance provided to its residential customers.

The Ministers' Letter stated the government's intention that CEAP reach the most residential consumers possible, and consider a number of criteria for eligibility and support levels to help reach the most people. To achieve this goal in a timely manner the OEB will look to the Gas Utilities to act as the primary point of contact with natural gas consumers, processing application forms for CEAP assistance, and crediting consumer bills for the appropriate amount where the relevant eligibility criteria have been met. A copy of the Ministers' Letter is attached.

In the Licence Decision the OEB established a comprehensive set of rules respecting the role of licensed electricity distributors and licensed unit sub-meter providers in administering CEAP. The intention of these rules is to help ensure that the \$9 million of public money being made available to fund CEAP is spent in a fair, transparent, and accountable manner. As Gas Utilities will be accessing this same source of funding, it is the OEB's expectation that they should follow similar procedures, subject to specific differences in eligibility and amounts of credits identified in the Ministers' Letter.

CEAP funding available for Gas Utilities

In the Licence Decision, the OEB determined that the fair approach to allocating the \$9 million in CEAP funds would be to base the funding allocation on the relative number of residential consumers, in keeping with the purpose of CEAP to support those residential consumers who have fallen behind in their bill payments on account of the COVID-19 emergency. On that basis the OEB will designate a total of \$3,770,317.67 to Gas Utilities that provide CEAP. This amount is based on the number of residential customers they collectively have in relation to residential customers in the electricity sector (including residential customers of unit sub-meter providers). This amount will be allocated to the individual Gas Distributors based on the number of residential

customers reported to the OEB. The amount to be allocated to each Gas Utility is as follows:

Enbridge Gas Inc.: \$3,675,385.32

EPCOR Natural Gas Limited Partnership: \$9,347.15

Kitchener Utilities:\$72,049.68

Utilities Kingston: \$13,535.51

As indicated in the Ministers' Letter, the Ministry of Energy, Northern Development and Mines will be entering into agreements with the Gas Utilities to transfer the appropriate funds.

Implementing CEAP for Gas Utilities

The implementation of CEAP by Gas Utilities should follow the approach set out in the Licence Decision to provide a consistent implementation across the province given the use of taxpayer funds. The OEB also expects that a similar implementation will be less confusing for consumers who may apply to both their electricity utility and their Gas Utility for CEAP credits. Therefore, the following expectations regarding implementation of CEAP in the natural gas sector are the same as those for electricity distributors and USMPs, except where specifically noted.

Eligibility Criteria and Application Form

The OEB has considered the Ministers' Letter and determined a set of eligibility criteria for CEAP. These eligibility criteria are consistent with both the Ministers' Letter and the Licence Decision. In order to be eligible for CEAP, a natural gas customer's account must meet the following criteria:

- (a) the account was in good standing (i.e. all amounts on account of natural gas charges that were payable were fully paid) on March 17, 2020, and the account was not enrolled in an arrears payment for amounts owing prior to March 17, 2020
- (b) complete payment on account of natural gas charges has not been made on at least two natural gas bills issued since March 17, 2020, and the account has an overdue balance on the date of receipt of the Application Form for the account including where the account is enrolled in an arrears payment agreement for amounts incurred following March 17, 2020,
- (c) the account has not received funding under the LEAP in 2020; and

- (d) the account holder has provided a complete Application Form and has declared, through the Application Form, that they or their spouse or common-law partner that resides in the same residence:
- are unemployed on the date that they provide their completed Application Form to the Licensee
 - have received Employment Insurance or the Canada Emergency Response Benefit since March 17, 2020

The OEB expects the Gas Utilities to confirm the information in items (a), (b) and (c) by reviewing the applicants' account information. The Gas Distributors are not expected to confirm the information in item (d).

These eligibility criteria have been reflected in an application form that the OEB has prepared in cooperation with the Ministry of Energy, Northern Development and Mines for use by the Gas Utilities (Application Form), which is attached to this letter. The OEB will provide a final Application Form in both official languages and in an online, fillable PDF shortly. The Application Form is modelled on a similar application form that will be used in the electricity sector pursuant to the Licence Decision. Gas Utilities will be required to use the Application Form and its embedded eligibility criteria if they wish to be reimbursed for their CEAP amounts and to ensure similar access to CEAP across the two energy sectors.

Where a completed Application Form has been received, and the Gas Utility has confirmed the information in items (a) through (d) above, the Gas Utility should credit the account holder's account. As indicated in the Ministers' Letter, the amount of the credit should be equal to the amount needed to settle up to half the amount of the overdue balance with respect to natural gas charges at the time the application was filed up to a maximum of \$160 for account holders in Northern Ontario, and up to \$80 for all other customers. For simplicity of implementation, Northern Ontario should be defined as an account holder within the Union Northwest or Union Northeast rate zones. The credits should appear on the next bill issued by the Gas Utility to the consumer where possible, and on the following bill in all other cases.

For the purpose of determining the amount of the credit, "natural gas charges" are defined to mean:

- (a) In the case of rate-regulated Gas Utilities all OEB approved charges for the supply, transportation, delivery and storage of natural gas, and similar charges for the non-rate-regulated Gas Utilities; and;

(b) for OEB rate-regulated Gas Utilities, and similar charges for non rate-regulated Gas Utilities, all -approved specific service charges, including late payment charges, and such other charges and applicable taxes associated with the consumption of natural gas as may be required by law to be included on the bill issued to the customer, but not including security deposits, amounts owed by a customer pursuant to a billing adjustment, or amounts under an arrears payment agreement entered into prior to March 17, 2020; and

For the purposes of determining the amount of the credit, “overdue balance” should be defined to mean the amount by which the account holder’s balance is past due in respect of natural gas charges at the time the Application Form is received. And for greater certainty, amounts that are not related to natural gas distribution, such as water services must not be included. Amounts that may be on the bill but are not yet past due are not part of the overdue balance.

With a view to ensuring that as many residential customers as possible are able to access CEAP, Gas Utilities should make the Application Form available on their websites and make best efforts to inform their customers about CEAP. Customers should be allowed to apply by e-mail or mail, and where a Gas Utility’s functionality may allow, online via webform or by phone. Where a Gas Utility accepts applications over the phone, the call should be recorded to document all aspects of the application form including consent and applicant self-declaration.

Completed Application Forms should be processed in the order that they are received. Gas Utilities should process completed Application Forms within 10 business days of receipt.

Timeline for Delivery of CEAP

The OEB in its Decision has required the electricity distributors and USMPs to start accepting CEAP applications as of July 13, 2020. Therefore, to ensure a consistent implementation of CEAP across the different energy sectors, Gas Utilities should start accepting applications for CEAP as of July 13, 2020. The OEB will support Gas Utilities’ implementation through consumer communication materials that will be provided to Gas Utilities prior to the July 13th commencement of application intake.

Recovery of Administrative Costs

In order to ensure that maximum funds are available to assist eligible customers, CEAP funding shall not be used to defray costs incurred by Gas Utilities to implement and administer the program. The OEB established a new sub account under Other Deferred Charges Account 179 titled “Impacts Arising from the COVID-19 Emergency, Sub-

account Other Costs”, for rate-regulated natural gas distributors on March 25, 2020. The OEB’s Accounting Order indicated that natural gas distributors may incur incremental costs related to the COVID-19 emergency. While CEAP was not known at the time of the issuance of the Order, the OEB is of the view that the implementation and administration of the CEAP fits within the criteria of the new sub account “Impacts Arising from the COVID-19 Emergency, Sub-account Other Costs”. Natural gas distributors may therefore record the costs of CEAP implementation into Account 179 Impacts Arising from the COVID-19 Emergency, sub-account Other Costs. The prudence of any costs recorded in this account will be reviewed at disposition.

Record Keeping and Reporting

To support any future requests for information about how the CEAP was implemented or to address possible customer issues regarding applications, the OEB expects that Gas Utilities retain the following information and be prepared to provide it to the OEB if requested:

- a) copies of all Application Forms received (including recordings of calls where the Application Form is provided by telephone, and copies of any communications with customers about CEAP),
- b) a record of all Application Forms that were accepted as complete and a credit was provided to CEAP-eligible accounts, and a record of all Application Forms that were denied, and
- c) a record of the credit provided to each CEAP-eligible account, as well as the total amount of credits provided to all CEAP-eligible accounts.

Gas Utilities are further requested to advise the OEB when they have expended all of their allocated CEAP funds.

The OEB asks that Gas utilities confirm with the OEB that they will be offering CEAP to their customers in the manner described in this letter. The OEB appreciates the assistance of the Gas Utilities in making this important program available to their customers in this challenging time.

Any questions relating to this letter should be directed to the OEB’s Industry Relations Enquiry e-mail at IndustryRelations@oeb.ca. Please include “CEAP Implementation” in the subject line.

Yours truly,

Formulaire de demande du Programme d'aide aux impayés d'énergie en raison de la COVID-19 (gaz naturel)

DIRECTIVES

Veillez remplir seulement une demande pour les impayés de gaz naturel liés à votre résidence principale (endroit où vous résidez pendant plus de 6 mois chaque année). Vous n'avez pas droit au financement du Programme d'aide aux impayés d'énergie en raison de la COVID-19 (PAIEC) pour plusieurs résidences, et pouvez recevoir du financement au titre du PAIÉC de la part de votre fournisseur de gaz naturel une seule fois. Vous pouvez faire une demande de soutien distincte au titre du PAIEC pour l'électricité auprès de votre entreprise d'électricité.

Une fois que vous aurez inscrit vos renseignements, veuillez signer ce formulaire et fournir votre consentement comme suit : (a) si vous envoyez le formulaire de façon électronique, en tapant votre ou vos noms dans la section 4; ou (b) si vous envoyez le formulaire par la poste, en imprimant le formulaire dûment rempli et en signant la section 4 à la main. Veuillez vous assurer que les renseignements que vous fournissez sont complets et à jour.

Une fois rempli, le formulaire peut être envoyé par courriel, ou imprimé puis posté à votre entreprise de services publics. Votre entreprise de services publics pourrait offrir d'autres façons de soumettre votre demande, y compris, dans certains cas, par téléphone. Veuillez consulter le site Web de votre entreprise de services publics ou la joindre pour obtenir plus de détails.

Le financement au titre du PAIÉC est restreint, et le fait de déposer une demande ne garantit pas que votre entreprise de services publics dispose encore de montants de financement. Les demandes seront traitées dans l'ordre de leur réception. Pour obtenir de l'information sur les programmes d'aide relative aux frais d'électricité pour les ménages à faible revenu, veuillez visiter le [site Web](#) de la Commission de l'énergie de l'Ontario.

ADMISSIBILITÉ AU PROGRAMME

Vous êtes admissible à ce programme si vous répondez à tous les critères ci-dessous :

1. Vous n'aviez pas d'impayés sur votre facture de gaz naturel au 17 mars 2020, date à laquelle l'état d'urgence sanitaire a été déclaré par la province.
2. À la date à laquelle vous faites votre demande, vous avez des impayés dus depuis au moins deux factures de gaz naturel depuis le 17 mars 2020.

3. Le titulaire de compte (personne dont le nom apparaît sur la facture) ou son époux/épouse ou conjoint(e) de fait (qui doit habiter à la même adresse que le titulaire de compte) :
 - I. est sans emploi à la date à laquelle la demande du PAIEC est présentée; et
 - II. a été admissible à recevoir la Prestation canadienne d'urgence (PCU) ou a touché des prestations d'assurance-emploi (AE) après le 17 mars 2020.
4. Le titulaire du compte n'a reçu aucune prestation du Programme d'aide aux impayés d'énergie (PAIE) en 2020.

Vous pourriez être admissible à un crédit supplémentaire si vous êtes un résident du nord de l'Ontario qui fait partie du territoire d'Enbridge - Union Gas Northeast ou de la zone tarifaire du nord-ouest.

Si vous n'êtes pas admissible au PAIEC, vous pourriez tout de même être admissible aux programmes d'aide aux impayés d'énergie pour les foyers à faible revenu. Veuillez consulter le [site Web](#) de la Commission de l'énergie de l'Ontario pour plus de renseignements. Vous pouvez également communiquer avec votre entreprise de services publics pour savoir comment conclure une entente de paiement des arriérés.
