## *Standby Rates for Load Displacement Generation*

Board Questions to COLLUS Power Corp EB-2005-0353:

Ref. Back-up/Standby Power, Sheet 6-1, Schedule 9-1 and Tab 1, page 21.

1. Please clarify the Applicants request for the proposed back-up/standby power rate. Is the Applicant proposing a new rate or just a placeholder for a future rate?

Response: At the time of sending in the application it appeared that a new customer with co-generation capabilities would be begin operation in 2007. Over the past few months it has become clear that this will not be the case. Therefore neither a placeholder nor rate are required.

2. If the response to part A is for the latter, please explain why the Applicant feels it is necessary to receive approval for a placeholder at this time.

Response: This is not applicable any longer as placeholder is not been sought.

3. Please provide any updated information that the Applicant may have on this issue.

Response: The updated information is that the potential customer is no longer applicable.

Respectfully Submitted,

Mr. T. (Tim) E. Fryer  
Chief Financial Officer
