ONTARIO ENERGY BOARD

In the matter of *the Ontario Energy Board Act, 1998*;

And in the matter of an application by Canadian Niagara Power Inc.,
for an Order or Orders approving electricity distribution rates for its Fort
Erie service territory to be implemented on May 1, 2007.

APPLICATION

The applicant is Canadian Niagara Power Inc., a subsidiary of FortisOntario Inc. FortisOntario Inc. is an Ontario corporation with its head office located in Fort Erie, Ontario. Canadian Niagara Power Inc. owns and operates transmission and distribution facilities in Fort Erie, Port Colborne and Gananoque (Eastern Ontario Power). In particular, this application is specific to Canadian Niagara Power Inc.'s distribution operations in its Fort Erie service territory, ("CNPI – Fort Erie").

Canadian Niagara Power Inc. hereby makes an application to the Ontario Energy Board (the "Board") for an Order or Orders approving electricity distribution rates effective May 1, 2007.

On December 20, 2006 the Board issued the *Report of the Board of Cost of Capital and 2nd Generation Incentive Regulation for Ontario's Electricity Distributor's* (the Report). The Report presented the associated guidelines for electricity distributors to use to prepare their 2007 electricity distribution rate applications.

On December 20, 2006 the Board issued the 2007 electricity distribution rate application model (the "2007 EDR IRM Model") together with instructions for filing 2007 rate applications.

1 On January 17, 2007 the Board issued filing instructions for 2007 Electricity
2 Distribution Rate Applications together with file numbers for the 2007 EDR
3 applications.

4
5 CNPI – Fort Erie is applying for electricity distribution rates on the basis of the cost
6 of capital and 2nd generation IRM policies as set out in the Report.

7
8 CNPI – Fort Erie is seeking approval of electricity distribution rates to be
9 implemented on May 1, 2007.

10
11 CNPI – Fort Erie is seeking approval for distribution rate riders for the recovery of a
12 Z-factor related to a natural disaster which inflicted significant damage to the CNPI -
13 Fort Erie's electricity distribution system in October 2006. In the interest of
14 expediency and to facilitate the implementation of 2nd generation IRM, CNPI – Fort
15 Erie is amenable to implementation of interim rates effective May 1, 2007 allowing
16 additional time, if required, for disposition of final rates that include the Z-factor rate
17 riders.

18
19 The evidence to be filed with the Board will include; the 2007 EDR IRM related to
20 CNPI – Fort Erie, completed in compliance with Board instructions, and; complete
21 documentation related the Z-factor as specified in Appendix C of the Report.

22
23 The written evidence filed with the Board may be amended prior to the Board's final
24 decision. Further, CNPI – Fort Erie may seek meetings with Board staff and
25 intervenors in an attempt to identify and reach agreements to settle issues arising
26 out of this application.

27
28 The persons affected by this application are the rate payers of CNPI – Fort Erie's
29 distribution business.

1 **MANAGER'S SUMMARY**

2

3 **PREAMBLE**

4

5 CNPI – Fort Erie has used the Board approved 2006 EDR and the Board approved
6 2006 PILS / Corporate Tax Filing, RP-2005-0020/EB-2005-0344 as the basis for
7 inputs to the 2007 EDR IRM.

8

9 CNPI – Fort Erie has used the Board's Decision and Order related to RP-2005-
10 0020/EB-2005-0344 as the basis for 2006 electricity distribution rates, service
11 classifications and rate classifications.

12

13 CNPI – Fort Erie received Board approval for Large Corporation Tax ("LCT") in the
14 2006 EDR. CNPI – Fort Erie has acknowledged this in the 2007 EDR IRM Model
15 and has completed the required adjustment in compliance with Board direction in
16 this matter.

17

18 CNPI – Fort Erie has not modified or supplemented the 2007 EDR IRM Model.

19

20 CNPI – Fort Erie has, together with this application for 2007 electricity distribution
21 rates, made an application for the recovery of a Z-factor. The application for
22 recovery of a Z-factor is contained in Appendix C of this Manager's Summary.

23

24 **THE 2007 EDR IRM MODEL**

25

26 CNPI – Fort Erie has completed the 2007 EDR IRM Model in compliance with the
27 instructions provided by the Board. The service and rate classifications together
28 with the associated electricity distribution rates included in the 2007 EDR IRM Model

1 are those approved by the Board in its Decision and Order in the matter of RP-2005-
2 0020/EB-2005-0344.

3

4 CNPI – Fort Erie was subject to the LCT in its 2006 EDR; an adjustment has been
5 made in the 2007 EDR IRM Model, specifically:

- 6 • Approved 2006 LCT Allowance¹ \$57,011.67
- 7 • 2006 Base Revenue Requirement² \$8,065,671.19
- 8 • Rate Reduction Ratio 0.71%

9

10 The smart metering plan rate adder approved by the Board in its Decision and Order
11 in the matter of RP-2005-0020/EB-2005-0344 has been identified in the 2007 EDR
12 IRM Model; CNPI – Fort Erie has not included an amount for the 2007 EDR IRM.

13

14 CNPI – Fort Erie did not receive Board approved incremental CDM spending in the
15 2006 EDR.

16

17 **Z-FACTOR APPLICATION**

18 Appendix C of this Manager's Summary contains CNPI – Fort Erie's application for
19 an Order or Orders approving 2007 Z-factor amounts and Rate Riders for the
20 recovery of those amounts effective May 1, 2007.

21

22 Appendix C is CNPI – Fort Erie's application and provides details of the event
23 together with evidence. Briefly stated, on October 12, 2006, Fort Erie and Port
24 Colborne were hit with a historic snow storm (the "October Disaster"). The October
25 disaster dropped more than 30 centimetres of moisture laden snow on the area
26 covering fully leaved trees, this was followed by strong winds; the results were

¹ The LCT is the Board approved 2006 PILS / Corporate Tax Filing, RP-2005-0020/EB-2005-0344, Tab Test Year PILs, Tax Provision, Cell D31.

² The Base Revenue Requirement is the approved 2006 EDR, RP-2005-0020/EB-2005-0344, sum of Tab 5-5 Base Revenue Requirement, Cell F27 and Tab 6-3 Trfmr Ownership (Input) Cell R120.

1 catastrophic. Within hours of the storm's beginning all 15,000 customers in Fort Erie
2 and 3,500 customers in Port Colborne were without power. In neighbouring Buffalo,
3 New York, some 200,000 customers were without power. The October Disaster was
4 clearly not within the control of management; it was a natural disaster of historic
5 proportions. Never has such an event been recorded since records were first kept
6 beginning in the 1870's.

7
8 To effect repairs to the distribution systems and restore power to its customers
9 efficiently and in a timely fashion, CNPI had to marshal resources from neighbouring
10 electricity distributors in southern Ontario as well as neighbouring municipalities and
11 private contractors.

12
13 CNPI has calculated that its cost for the October Disaster is \$2,601,758. CNPI
14 carries insurance against disasters of this nature and anticipates that the proceeds
15 from the claim will be \$500,000; this amount has been deducted against the claim
16 amount. In addition, CNPI has calculated that \$242,883 is non incremental internal
17 labour; this amount has also been deducted from the claim. An amount of \$4,500
18 was attributable to transmission and has been deducted.

19
20 The balance, \$1,965,825, inclusive of interest improvement is CNPI's claim for a Z-
21 factor. This amount has been allocated between the Fort Erie and Port Colborne
22 service territories on the basis of time records kept during the restoration process.
23 Supervision, material, equipment and incidentals (including meals and lodging) were
24 allocated in the same manner as was the labour.

25
26 \$1,712,731 has been allocated to CNPI – Fort Erie. This amount has been allocated
27 in the same manner as was account 1572 (Extra Ordinary Event Losses) in the Final
28 Recovery of Regulatory Assets in the 2006 EDR process. The amount has been
29 allocated to the customer classes on the basis of the customer count as recorded in

1 the 2006 EDR³. Volumetric Rate Riders were then calculated utilizing the allocated
2 amount and the respective customer class volumetric billing determinant as stated in
3 the 2006 EDR.

4

5 In an effort to mitigate the rate impact that the imposition of a Z-factor Rate Rider will
6 have on the ratepayers: CNPI – Fort Erie is requesting that the Board in its Order or
7 Orders related to this matter allow CNPI – Fort Erie to collect the Z-factor over a
8 period of two years.

9

10 **RATE RIDERS**

11

12 CNPI – Fort Erie is seeking the Board's approval for the electricity distribution Rate
13 Riders shown below:

Residential

Rate Rider 1 (Z-factor) \$/kWh 0.0069

General Service Less Than 50 kW

Rate Rider 1 (Z-factor) \$/kWh 0.0015

General 50 to 4,999 kW

Rate Rider 1 (Z-factor) \$/kW 0.0211

³ The 2006 EDR was chosen as the basis for the customer count since it is the basis of current electricity rates. Any variance resulting from customer growth will be recorded in the deferral account for final disposition.

SERVICE CLASSIFICATIONS

FOR OEB STAFF USE ONLY

Residential

The Residential Class (Regular) refers to a service taking electricity normally at 750 volts or less where the electricity is used for domestic and household purposes in a single family unit. A single family unit being a permanent structure located on a single parcel of land and approved by a civic authority as a dwelling and occupied for that purpose by a single customer. Residential rates are also applied to apartment buildings with 6 units or less that are bulk metered. Apartment buildings with more than 6 units that are bulk metered are deemed to be General Service.

General Service Less Than 50 kW

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) less than 50 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer. An apartment building with more than 6 units that is bulk metered and has an average peak demand less than 50 kW is deemed to be General Service less than 50 kW. The common area of a separately metered apartment building having a demand less than 50 kW is also deemed to be General Service less than 50 kW.

General Service 50 to 4,999 kW

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) equal to or greater than 50 kW but less than 5000 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer.

Unmetered Scattered Load

This classification refers to the supply of electrical service to a customer that is deemed to have a constant load over a billing period, normally with minimum electrical consumption and the consumption is unmetered. Energy consumption is based on connected wattage and calculated hours of use. Examples of unmetered scattered load are cable television amplifiers, billboards, area lighting.

Sentinel Lighting

This classification refers to all services required to supply sentinel lighting equipment.

Street Lighting

This classification refers to the supply of electrical service for roadway lighting. Energy consumption is based on connected wattage and calculated hours of use. Customers are usually a Municipality, Region or the Ministry of Transportation.

Sheet 4 - Smart Meter Information

The smart meter plan rate adder is a monthly service charge for metered customers. This equates to an equivalent amount of \$0.30 per month per residential customer for utilities that did not have a plan. A different amount applied to utilities who had a smart meter plan that was modified in accordance with the Decision with Reasons RP-2005-0020 / EB-2005-0529

Please identify the customer classes and sub-classes that smart meter funding incremental adjustment applies to by inserting the smart meter rate adder into column D. For most utilities, the rate adder can be located in the Board-approved 2006 EDR model, Sheet 8-5, Column T. Clicking the cursor on the Residential cell should show the formula for the monthly service charge including the smart meter adder. The adder is the same for all metered classes and sub-classes of a distributor.

The adjusted smart meter rate adder for 2007 has yet to be determined (column F). When a decision is made, Board Staff will adjust the application to reflect the updated smart meter adder.

Did the applicant receive Board approval for Large Corporation Tax in 2006? YES NO

For distributors that had a Large Corporation Tax (LCT) allowance approved in their 2006 distribution rates, this sheet will reduce rates to reflect the removal of this allowance in 2007. The reduction in the allowance will be reflected through a percentage decrease in distribution rates calculated by the ratio of 2006 LCT allowance to the 2006 Base revenue requirement. The 2006 Board-approved LCT allowance is found in your Board-approved 2006 PILs model, sheet "Test Year OCT, LCT", cell E181. The 2006 Board-approved base revenue requirement is found in your 2006 Board-approved EDR model, sheet 5-1, cell F22.

SERVICE CLASSIFICATIONS

FOR OEB STAFF USE ONLY

Residential

The Residential Class (Regular) refers to a service taking electricity normally at 750 volts or less where the electricity is used for domestic and household purposes in a single family unit. A single family unit being a permanent structure located on a single parcel of land and approved by a civic authority as a dwelling and occupied for that purpose by a single customer.

Residential rates are also applied to apartment buildings with 6 units or less that are bulk metered. Apartment buildings with more than 6 units that are bulk metered are deemed to be General Service.

General Service Less Than 50 kW

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) less than 50 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer. An apartment building with more than 6 units that is bulk metered and has an average peak demand less than 50 kW is deemed to be General Service less than 50 kW. The common area of a separately metered apartment building having a demand less than 50 kW is also deemed to be General Service less than 50 kW.

General Service 50 to 4,999 kW

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) equal to or greater than 50 kW but less than 5000 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer.

Unmetered Scattered Load

This classification refers to the supply of electrical service to a customer that is deemed to have a constant load over a billing period, normally with minimum electrical consumption and the consumption is unmetered. Energy consumption is based on connected wattage and calculated hours of use. Examples of unmetered scattered load are cable television amplifiers, billboards, area lighting.

Sentinel Lighting

This classification refers to all services required to supply sentinel lighting equipment.

Street Lighting

This classification refers to the supply of electrical service for roadway lighting. Energy consumption is based on connected wattage and calculated hours of use. Customers are usually a Municipality, Region or the Ministry of Transportation.
