Enbridge Gas Inc. Natural Gas Prices are Changing

The Ontario Energy Board (OEB) has approved new interim natural gas prices for Enbridge to take effect October 1, 2024.¹

REASONS FOR CHANGES TO NATURAL GAS BILLS

Quarterly Rate Adjustment Mechanism (QRAM)

Notably, the market price is decreasing due to higher-than-normal natural gas storage inventories in North America, driven primarily by warmer than normal weather in prior periods.

Total Annual Bill Impact

As noted in Table 1, beginning October 1, 2024, the total annual bill impact* for residential customers using a typical amount of natural gas in each rate zone will be:

The QRAM is the process by which the OEB adjusts the prices that natural gas customers pay for the natural gas that they use and to reflect changes in natural gas market prices.

These price changes are approved to take effect on the 1st of the month in January, April, July, and October each year.

The OEB does not allow natural gas distributors to earn a profit on the sale of natural gas, regardless of market fluctuations in price.

Other Rate Changes

The OEB also sets rates that natural gas distributors can charge for the delivery and storage of natural gas.

Any changes to those rates that are approved by the OEB between QRAM decisions typically also take effect on the first day of the next calendar quarter.

Table 1

Rate Zone and Typical Annual Usage for a Residential Customer	Enbridge Gas Distribution 2,400 m ³	Union South 2,200 m ³	Union North East 2,200 m ³	Union North West 2,200 m ³
Total Annual Bill – Current	\$1,218.93	\$1,054.79	\$1,311.90	\$1,131.11
– Beginning October 1, 2024	\$1,196.92	\$1,038.18	\$1,319.16	\$1,099.20
Total Annual Bill Impact	-\$22.01	-\$16.61	\$7.26	-\$31.91
– Percentage Change	-1.8%	-1.6%	0.6%	-2.8%

¹ In Phase 1 of Enbridge's 2024 Rebasing proceeding, the OEB approved the establishment of interim 2024 rates to reflect that the proceeding is being conducted in phases and that certain interim 2024 rates may be further adjusted to incorporate the full impacts of determinations to be made in Phase 2 of the proceeding. The OEB likewise approved Enbridge's October 2024 QRAM application on an interim basis. This QRAM implements new methodologies approved by the OEB in Phase 1 of Enbridge's 2024 Rebasing proceeding to harmonize certain gas costs and methodologies across all rate zones.

**Bill impacts will vary depending on how much natural gas individual customers use. Natural gas use is generally lowest during the summer months.*

Other Rate Changes

Other changes taking effect on October 1, 2024 and included in Table 1 are temporary rate adjustments previously approved by the OEB in Enbridge's 2021 Demand Side Management Deferral and Variance Account proceeding.² These temporary rate adjustments, which will apply only to bills for October, range between a credit of \$5.38 and a charge of \$7.13 for a typical residential customer, depending on the rate zone.

About the QRAM

Natural gas is a commodity that is bought and sold on North American energy markets. At any given time, its price fluctuates based on a variety of factors including supply and demand, seasonal changes, levels of stored natural gas, and major weather events. Enbridge updates its forecast of market prices every three months and uses that forecast to seek the OEB's approval of its proposed changes to natural gas commodity prices. These proposed changes cover:

- **Future costs:** This is based on a forecast of market prices for natural gas over the next 12-month period.
- **Past costs:** This is based on the difference between what the utility previously forecast that their customers would pay and what their customers actually paid. This kind of adjustment is needed because the gas prices charged to customers are based on forecasts, which are never 100% accurate. The adjustment for past costs can increase or lower the rate accordingly. For example, if a utility collected more from customers than it paid for gas in the past, the difference is credited back to customers through a lower rate. Likewise, if not enough was collected by the utility, the rate will be higher.

The OEB does not allow natural gas distributors to earn a profit on the sale of gas, regardless of market fluctuations in price.

Resources to Support Natural Gas Customers

- **Low-income Energy Assistance Program (LEAP)**
This program provides a grant towards a customer's electricity and/or natural gas bill if they're behind on their bill payments and may face having their service shut off. It is for emergency situations. See [OEB.ca/BillHelp](https://www.oeb.ca/BillHelp)
- **Rules for low-income customers**
Electricity utilities, natural gas utilities and unit sub-metering providers follow customer service rules specific to low-income customers. These include waiving security deposits and allowing longer payment times under arrears payment plans. See [OEB.ca/BillHelp](https://www.oeb.ca/BillHelp)
- **Enbridge** – To help consumers save energy and lower their natural gas bill, Enbridge offers rebates for energy-efficiency upgrades and free upgrades for income-qualified homes.

About the OEB

² EB-2023-0062, May 7, 2024

The OEB is the independent regulator of Ontario's electricity and natural gas sectors. It protects the interests of consumers and supports the collective advancement of the people of Ontario. Its goal is to deliver public value through prudent regulation and independent adjudicative decision-making which contributes to Ontario's economic, social and environmental development.

Independence in the hearing and determination of matters is a key element of the OEB's mandate, established through legislative structures, the Memorandum of Understanding between the Minister of Energy and the Chair of the OEB, and by-laws that set out clear lines of communication between government and the OEB. Commissioner panels hear and determine matters independently, with legislative protections and other instruments to ensure decisions are free from interference by the CEO, the Board of Directors and government. This also includes the Chief Commissioner when not assigned to the specific case.

This Backgrounder was prepared by OEB staff to inform Ontario's energy consumers about the OEB's decision and is not for use in legal or regulatory proceedings. It is not part of the OEB's reasons for the decision; those may be found in the Decision and Interim Rate Order issued today, which is the official OEB document.
